I don't see a reason to wait on starting the SUUM work. Mark?

Based on our aldicarb discussions so far, it sounds like we'll be providing an extended SUUM. I don't think the outstanding questions would change the SUUM. Should I start thinking about that, or is there a reason we should wait? We would provide the low usage estimates we just discussed in a separate document, right?

Subject: Aldicarb: preliminary usage data for requested crops

Hey Mark, before I share with the group, here's the state level usage data available for aldicarb from NASS and from Kynetec (back to 1998), for the requested crops. Any thoughts before I share with the team? (Should I share with the team?)
